Staph/MRSA

How to Limit and Prevent the Spread of Staphylococcal Infections in Schools

1. Recognize and report cuts, scrapes and spider bites to your nurse, coach, teacher.

2. Keep cuts covered with a clean dry bandage until healed.

3. Keep hands clean (wash with soap and water or alcohol sanitizer often).

4. Do not share personal items or equipment (such as razors, deodorants, uniforms, helmets, towels, etc.).

5. Keep sports equipment clean (follow coach’s instructions).
